DETAILED ACTION

The prior restriction dated 10/28/08 has been withdrawn and replaced with the following.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 21, 43 and 47, drawn to a consumable.

Group II, claim(s) 22, 44, and 48, drawn to a method of making a consumable at a manufacturing location.

Group III, claim(s) 23-24, drawn to a method of operating a printing apparatus and printer.

Group IV, claim(s) 25-39, drawn to a printing apparatus.

Group V, claim(s) 40, 45, 49 and 51, drawn to a consumable and method of making.

Group VI, claim(s) 41, 42, 46, 50, and 52, drawn to a consumable and method of making.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Invention I lacks the special technical feature of being marked at a manufacturing location as seen in invention II;

Invention I lacks the special technical feature of reading an identifier from the consumable as seen in invention III;

Invention I lacks the special technical feature of printer and corresponding storage medium as seen in invention IV;

Invention I lacks the special technical feature of uniquely identifying the consumable as seen in invention V;

Invention I lacks the special technical feature of the first identifier being programmed during fabrication as seen in invention VI;

Invention II lacks the special technical feature of reading an identifier from the consumable as seen in invention III;

Invention II lacks the special technical feature of printer and corresponding storage medium as seen in invention IV;

Invention II lacks the special technical feature of uniquely identifying the consumable as seen in invention V;

Invention II lacks the special technical feature of the first identifier being programmed during fabrication as seen in invention VI;

Invention III lacks the special technical feature the first identifier being programmed during fabrication as seen in invention VI;

Invention III lacks the special technical feature of uniquely identifying the consumable as seen in invention V;

Inventions III lacks the special technical feature of the first identifier being programmed during fabrication as seen in invention VI;

Invention IV lacks the special technical feature of uniquely identifying the consumable as seen in invention V;

Invention IV lacks the special technical feature of the first identifier being programmed during fabrication as seen in invention VI; and

Invention V lacks the special technical feature of the first identifier being programmed during fabrication as seen in invention VI.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MATTHEW G. MARINI whose telephone number is (571)272-2676. The examiner can normally be reached on Monday-Friday 8:00 to 5:00.
